

Integrated Digital Learning

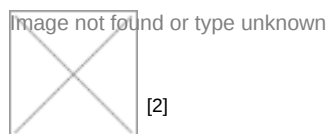

In this section, you can access the dedicated Padlet and interactive exercises. The creation of the educational game materials utilizes various Educational Technology platforms, such as Wordwall and LearningApps. Thanks to these platforms, exercises and online quizzes will be constantly created and updated for the platform users. The exercises can take various forms, such as multiple-choice quizzes, matching audio and images, or creating actual games in the style of Pac-Man with the possibility of tackling interactive mazes.
